

INTRECCIO

Corten Table

DESCRIPTION

A narrative thread that writes on the corten sheet as it was a white leaf to be personalized. The tabletop is composed of eight septa decorated by water jet technology.

The base segments the table top made of okumè wood and projects eight beams onto the flat circular shape. The slight lines in corten, in contrast with the color of natural wood, make original the top view of the furniture. Intreccio is suitable for furnishing the most sought-after interior and exterior spaces.
