

# TIVOLI

## Corten table

### DESCRIPTION

Corten table, TIVOLI, is project by the Apulian Architect Marica Lestingi who has designed the furniture to meet the customer's style and functionality needs. The essential design of the table integrates with irregular and sinuous lines that cut the table top where the travertine marble detail is provided. Marica has set up external spaces with the TrackDesign fittings that have been added to the exclusive catalog of TrackDesign in corten steel. Tivoli could be combined with the chairs of the RIVER collection and outdoor benches made on customer's request.
