

INCASTRO

Umbrella stand in corten steel

DESCRIPTION

The Incastro umbrella stand is an elegant accessory for any indoor environment. Its shape is given by the meeting of two curved sheets in corten steel.

The different heights, spaced by longitudinal shutters, accentuate the depth of the surfaces in a game of shadows.

The holes arranged on the whole height of the object favor the quick drying of wet umbrellas. INCASTRO is equipped with a * removable internal accessory useful and thought for the collection of water from the umbrellas.

In the same collection, TrackDesign proposes also Incastro | Corten vase.
