

**BRAND:** TrackDesign

**DESIGNER:** Francesco Paolo Maria Giuliani

**PRODUCT NAME:** IL RIFUGIO DELLA LUNA

**COLLECTION:** IL RIFUGIO DELLA LUNA

## DESCRIPTION

The floor lamp, two meters high, simulates a small metal architecture that turns into an illuminating "domestic monument". The warm tones of the corten enhance the function of the light and the iconic character of the object. The designer Francesco Paolo Maria Giuliani compares the colored fabric cable to an umbilical cord that reaches the light source and projects, through the decorations on the sheet metal of the lampshade, a unique play of lights and shadows.

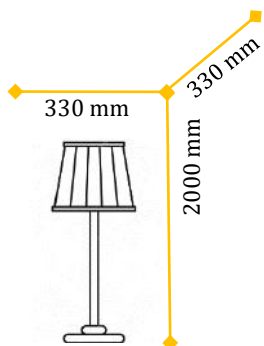

"Il Rifugio della Luna" is the floor lamp, elegant and slender, which illuminates every interior with originality.

## DETAILS

Materials: waxed corten steel, E27 bulb, fabric electric cable.

Product indicated for indoor use.
