

GIRAFFA

Corten lamp

GIRAFFA is the arched floor lamp designed by the designer Giuseppe Pio D'Altilia who drew inspiration from the animal world. The designer has summarized the slender silhouette of the giraffe through a geometric study that gives the lamp's profile. The base of the object provides a support for small objects and pockets for storing books and magazines. The playful component of the designer's creative process is combined with the geometric, elegant and essential synthesis that characterizes the work of D'Altilia.
