

MUSIC

Corten chair

Music is the corten steel furniture line inspired by the shape of a cello. The chair is characterized by a refined and essential design, in which the seat and back reproduce the contours of the case of a cello, which is projected onto the surfaces, outlining its shape with the contours and the resonant fs. Music, which praises the beauty of string instruments, gives a touch of harmony to interiors or exteriors. The chair is also available in steel with different finishes.
